

MADISON WATERSHED PLANNING MEETING

JANUARY 25, 2017
6:00 PM ENNIS SCHOOL CAFETERIA

MADISON WATERSHED PLANNING OBJECTIVES:

- Identify current and future water resource concerns in the Madison Watershed.
- Identify opportunities to work collaboratively to find solutions to these water resource concerns.
- Develop and adopt a Madison Watershed Plan that identifies: priority water resource concerns, opportunities to make improvements, available funding sources, and additional resources or information needed in the watershed.

MEETING AGENDA:

- I. Welcome & Introductions
- II. Bringing Water Quality and Quantity into the Same Conversation
- III. Water Quality in the Madison
- IV. What is Drought Resilience?
- V. Short Film — “Water from Stone”
- VI. Water Planning Road Map
- VII. How Can you Help?
- VIII. Activity
- IX. Open Discussion—Q&A

WHAT’S NEXT?

- *March—How will climate affect water supply in the Madison?
 - *April—Groundwater and surface water connectivity in the Madison
 - *May—Management practices to improve water quality and drought resilience
 - *June—How can TMDLs help us with watershed planning?
 - *July—Final steps to determine water resource priorities and improvement opportunities
- *=Suggested dates and topics that are subject to change*
